

June 2021

To whom It may concern,

Nano-Z coating LTD. And it's lead technologist and CEO Mr. Ofer Levy had developed a unique product for the use of coating pampered glass and providing it with invisible water-repellent coating.

During the development process, the company resolutely meet the Israeli Navy's requirements for the coating.

After finishing all the navy required examination, the product was applied on a submarine. After evaluating the NOP 400 coating for three months it can be said that the coating had achieved its main purpose for a much longer period of time then the original demands.

With Kind Regards,

Major Helena Auslender
Head of Materials Section,
Marine Architecture,
Department of Naval Engineering.
